Quem somos nós?

A Proon é uma empresa familiar especializada na distribuição de marcas renomadas de áudio profissional. Atuamos com excelência, oferecendo soluções completas, confiáveis e de alta performance para profissionais e empresas do setor de tecnologia sonora.

Nossa História

Fundada em 2006 no Mercosul, a Proon nasceu com o propósito de elevar o padrão de qualidade em áudio profissional na América Latina. Ao longo dos anos, expandimos nossa presença para o Brasil e os Estados Unidos, consolidando nossa reputação como referência em equipamentos de áudio, projetores e instrumentos musicais.

Presença Internacional

Hoje, a Proon marca presença em diversos países da América Latina, com operações ativas e parcerias estratégicas nos principais mercados da região. Nosso crescimento sustentável é fruto de um compromisso contínuo com inovação, qualidade e relacionamento de longo prazo.

Nossa Visão

Ser reconhecida como a principal distribuidora de soluções em áudio profissional na América Latina, conectando tecnologia e excelência a cada projeto, com foco em performance, confiabilidade e suporte personalizado.

Nosso Foco

Atuamos com um portfólio de marcas globais respeitadas, atendendo aos mais altos padrões de exigência. Nosso objetivo é fornecer produtos de alto desempenho e durabilidade, acompanhados de um serviço técnico qualificado e suporte completo em todas as etapas do processo comercial.

Parcerias com Revendas

Hoje, a Proon marca presença em diversos países da América Latina, com operações ativas e parcerias estratégicas nos principais mercados da região. Nosso crescimento sustentável é fruto de um compromisso contínuo com inovação, qualidade e relacionamento de longo prazo.

Conectando Pessoas e Propósitos

Mais do que entregar tecnologia, a Proon acredita que o verdadeiro diferencial está na construção de conexões humanas. Por isso, cultivamos relacionamentos baseados em confiança, transparência e colaboração. Porque, no fim, é o som da conexão humana que move o mundo.

LINE ARRAY

ShowMatch SM20 DeltaQ array loudspeaker

DeltaQ™ technology with adjustable coverage
400 W continuous, 1600 W peak power
20° vertical coverage module
Premium Bose concert sound
Compact, lightweight design
Easy integration with ShowMatch system

ShowMatch SM10 DeltaQ array loudspeaker

DeltaQ™ technology with adjustable coverage
300 W continuous, 1200 W peak power
10° vertical coverage module
Clear, powerful Bose sound
Compact, lightweight design
Easy integration with ShowMatch system

ShowMatch SMS118 subwoofer

18-inch high-excursion woofer
750 W continuous, 3000 W peak power
Extended low-frequency response
Cardioid-array capable
Compact design for easy deployment
Optimized for ShowMatch DeltaQ systems

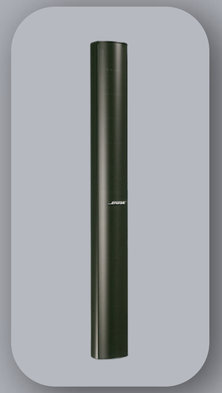

ShowMatch SM5 DeltaQ array loudspeaker

DeltaQ™ technology with adjustable coverage
400 W continuous, 1600 W peak power
5° vertical coverage module
High-output concert sound
Compact, lightweight design
Seamless integration with ShowMatch system

COLUNA ARRAY

MA12 modular column array loudspeaker

Modular column array for flexible coverage
12 full-range drivers per module
300 W continuous, 1200 W peak power
Clear, consistent sound for speech and music
Slim, vertical design for discreet installations
Easy integration with MA Series systems

MSA12X powered beam-steering array loudspeaker

12 amplified drivers with beam-steering technology
600 W total power (12 × 50 W)
Digital beam control for precise coverage
Dante™ and AES67 network audio compatible
Slim, modern design for installations
Ideal for speech and music in reverberant spaces

MA12EX modular column array loudspeaker

Modular column array for scalable coverage
12 full-range drivers per module
400 W continuous, 1600 W peak power
Clear, consistent sound for speech and music
Slim, vertical design for discreet installations
Easy integration with MA Series systems

COLUNA *ARRAY E CAIXAS PORTÁTEIS*

L1 Pro32 portable line array system

Portable line array with 32 drivers for wide coverage
2 × 500 W power for full-range output
Advanced bass integration for deep low-end
Clear, natural sound for speech and music
Lightweight, easy to transport and set up
Ideal for live performance, presentations,
and small venues

L1 Pro16 portable line array system

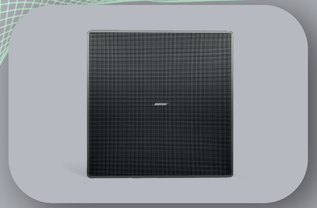

Portable line array with 16 drivers for wide coverage
2 × 250 W power for clear full-range output
Integrated bass for punchy low-end
Clear, natural sound for speech and music
Lightweight and easy to transport
Ideal for small to medium live performances
and events

L1 Pro8 portable line array system

Compact portable line array with 8 drivers
2 × 120 W power for clear full-range output
Integrated bass for punchy low-end
Clear, natural sound for speech and music
Lightweight and ultra-portable
Ideal for solo performers, small venues,
and presentations

ARANDELAS

EdgeMax EM180-LP loudspeaker

Low-profile loudspeaker for fixed installations
180 W continuous, 720 W peak power
Wide horizontal coverage for speech and music
Clear, consistent sound in large spaces
Weather-resistant design for indoor/outdoor use
Compatible with EdgeMax system for scalable setups

EdgeMax EM180 loudspeaker

Full-range loudspeaker for fixed installations
180 W continuous, 720 W peak power
Wide horizontal coverage for speech and music
Clear, consistent sound in large spaces
Weather-resistant design for indoor/outdoor use
Compatible with EdgeMax system for scalable setups

EdgeMax EM90-LP loudspeaker

Low-profile loudspeaker for fixed installations
90 W continuous, 360 W peak power
Wide horizontal coverage for speech and music
Clear, consistent sound in large spaces
Weather-resistant design for indoor/outdoor use
Compatible with EdgeMax system for scalable setups

EdgeMax EM90 loudspeaker

Full-range loudspeaker for fixed installations

Compatible with multiple commercial and professional audio systems
User-friendly interface for fast setup and analysis
Ideal for audio consultants, integrators, and system designers

Modeler

Advanced acoustic modeling software for professional audio systems
Simulates room acoustics and loudspeaker performance accurately
Supports multiple Bose commercial and professional audio products
User-friendly interface for fast setup and analysis
Ideal for integrators, consultants, and system designers

MSA Design Tool

Software for designing and optimizing commercial audio systems
Simulates speaker placement, coverage, and acoustic performance
Supports multiple Bose professional and commercial loudspeakers
User-friendly interface for fast and accurate system planning
Ideal for audio consultants, integrators, and system designers

BOSE PROFESSIONAL

SOFTWARE

ControlSpace Accelerator

Software tool for rapid deployment of ControlSpace audio systems
Simplifies configuration, monitoring, and system optimization
Compatible with multiple ControlSpace controllers and processors
User-friendly interface for fast setup and management
Ideal for integrators, IT administrators, and professional audio environments

ControlSpace Cloud

Cloud-based platform for managing ControlSpace audio systems
Remote monitoring, configuration, and diagnostics in real time
Secure, reliable access from anywhere
Simplifies deployment and maintenance of multiple devices
Ideal for integrators, IT administrators, and large-scale commercial environments

ControlSpace Designer

Software for designing and configuring ControlSpace audio systems
Provides intuitive tools for routing, processing, and zone control
Compatible with multiple ControlSpace controllers and processors
User-friendly interface for fast and precise system setup
Ideal for integrators, audio consultants, and professional installations

SOFTWARE

ControlSpace Remote

Mobile and desktop app for remote control of ControlSpace audio systems
Adjust volume, mute, and source selection from anywhere
Real-time monitoring and system status updates
Secure and reliable connectivity for professional environments
Ideal for integrators, IT administrators, and commercial installations

Configuration Utility

Software for configuring and managing Bose professional audio systems
Enables setup, firmware updates, and system optimization
Intuitive interface for fast and accurate configuration
Compatible with multiple Bose commercial and professional devices
Ideal for integrators, IT administrators, and system designers

Bose Music

Mobile app for controlling Bose smart speakers and sound systems
Easy setup, music playback, and multi-room management
Intuitive interface for seamless user experience
Supports streaming services and voice assistants
Ideal for home and small business audio environments

Discovery Tool

Software for detecting and managing Bose professional audio devices
Quick device discovery and network configuration
Real-time status monitoring for reliable operation
Compatible with multiple Bose commercial and professional systems
Ideal for integrators, IT administrators, and system managers

SOFTWARE

Master Fader Control App

Comprehensive Channel Processing – Full control of input channels including trim, polarity, 4-band fully parametric EQ, high-pass filter, gate, compressor, and output delay.

Mix Bus Control – Complete configuration of auxes, subgroups, and main outputs with independent processing chains.

Integrated FX Engine – Access to high-quality reverbs, delays, and modulation effects, with dedicated returns and processing.

Snapshot & Preset Management – Create, save, and recall show files and presets for fast setup and consistent sound.

Multi-Device Operation – Supports simultaneous wireless control by multiple devices, enabling FOH engineers, stage techs, and performers to adjust their own monitor mixes in real time.

Security & Access Control – Flexible user permissions for system admins, engineers, and musicians to ensure controlled operation.

Offline Mode – Allows preparation and configuration of mixes without requiring connection to hardware.

Cross-Platform Support – Available for iOS, Android, macOS, and Windows, ensuring compatibility across devices.

High-Resolution Visual Interface – Graphical EQ, metering, and signal flow visualization provide precise system tuning and monitoring.

Wireless Connectivity – Optimized for Wi-Fi networks, eliminating the need for physical control surfaces while maintaining low-latency operation.

LINE ARRAY

VIO L212

12-inch dual-driver line array loudspeaker
1400 W peak power with clear, punchy sound
Compact, lightweight design for easy transport and installation
Optimized for live sound, events, and medium to large venues
Durable construction for reliable performance in any environment

VIO L210

10-inch dual-driver line array loudspeaker
1200 W peak power with clear, punchy sound
Compact, lightweight design for easy transport and installation
Optimized for live sound, events, and small to medium venues
Durable construction for reliable performance in any environment

VIO L1610

10-inch compact line array loudspeaker
1200 W peak power with clear, punchy sound
Lightweight, portable design for easy transport and setup
Optimized for live sound, small to medium venues, and events
Durable construction for reliable performance in any environment

VIO L208

8-inch dual-driver line array loudspeaker
1000 W peak power with clear, punchy sound
Compact, lightweight design for easy transport and installation
Optimized for live sound, events, and small venues
Durable construction for reliable performance in any environment

dBTechnologies

MONITOR *DE PALCO*

FMX12

12-inch powered portable loudspeaker
800 W peak power with clear, punchy sound
Compact, lightweight design for easy transport and setup
Optimized for live sound, small to medium venues, and DJ applications
Durable construction for reliable performance in any environment

FMX10

10-inch powered portable loudspeaker
600 W peak power with clear, punchy sound
Compact, lightweight design for easy transport and setup
Optimized for live sound, small venues, and DJ applications
Durable construction for reliable performance in any environment

FMX15

15-inch powered portable loudspeaker
1000 W peak power with clear, punchy sound
Compact, lightweight design for easy transport and setup
Optimized for live sound, small to medium venues, and DJ applications
Durable construction for reliable performance in any environment

CONTROLES

CONTROL 24A

24-channel analog mixer with high-quality preamps
Clear, detailed sound with wide frequency response
Flexible routing with multiple subgroups and auxiliary sends
Built-in EQ for each channel for precise tonal control
Rugged design, ideal for live sound, studios, and rehearsal spaces

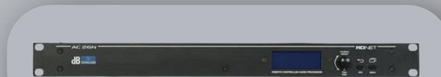

CONTROL 2

12-inch dual-driver powered loudspeaker
1300 W peak power with clear, punchy sound
Compact, rugged design for easy transport and setup
Extended low-frequency response for deeper bass
Ideal for live sound, DJ setups, and small to medium venues

CONTROL 8

8-channel compact analog mixer with high-quality preamps
Clear, detailed sound with wide frequency response
Flexible routing with auxiliary sends for monitoring and effects
Built-in EQ on each channel for precise tonal control
Rugged, portable design ideal for live sound, small venues,
and rehearsal spaces

AC26N

2-channel compact power amplifier
260 W per channel with clear, punchy sound
Lightweight and portable design for easy transport and installation
Optimized for small venues, portable PA, and live sound applications
Durable construction for reliable performance in any environment

dBTechnologies

SOFTWARE

Aurora Net

Networked audio management software
Real-time control of multiple devices
Easy configuration of speakers, amps, and DSP units
Optimized for live sound and installed systems
Intuitive, user-friendly interface

dB Technologies Network

Audio network management software
Real-time monitoring and control of multiple devices
Easy configuration of speakers, amplifiers, and DSP units
Optimized for live sound and installed systems
User-friendly interface for efficient setup

dB Technologies Composer

Audio system design and management software
Allows configuration and control of speakers, amps, and DSP units
Optimized for live sound, installations, and event setups
Real-time monitoring and performance adjustments
User-friendly interface for efficient workflow

SUBWOOFER

SUB 618

18-inch powered subwoofer
1600 W peak power for deep, punchy low frequencies
Compact, rugged design for easy transport and stage use
Optimized for pairing with DB Technologies full-range loudspeakers
Ideal for live sound, DJ setups, and medium to large venues
